## CHAPTER – 7

## **OUR COUNTRY – INDIA**

#### EXERCISE

**Q. 1 A** Answer the following questions briefly. Name the major physical divisions of India.

Answer:

India is marked by a diversity of physical features such as mountains, plateaus, plains, coasts and islands. The major physical divisions of India are:

1. The Himalayas2. The Northern Indian Plains3. The Great Indian Desert4. The Peninsular Plateaus and,5. The Islands.

Additional Information: The Himalayas are divided into three categories-The Great Himalayas, The Middle Himalayas and The Lesser Himalayas. The Great Indian Desert is a dry, hot and sandy stretch of land and has very little vegetation. The peninsular plateau lies towards the south of the Northern Plains. There are two Islands groups in India, The Andaman and Nicobar Islands and the Lakshadweep Islands.

Q. 1 B Answer the following questions briefly.

India shares its land boundaries with seven countries. Name them.

Answer:

Afghanistan, Bangladesh, Bhutan, China, Pakistan, Nepal and Myanmar share their border with India.

Additional Information: Afghanistan and Pakistan lie to the North-west of India while Bangladesh, Bhutan, China, Nepal and Myanmar lie to its east.

**Q. 1 C** Answer the following questions briefly. Which two major rivers fall into the Arabian Sea?

Answer:

The two major rivers that fall into Arabian Sea are Narmada and Tapi.

Additional Information: Narmada and Tapi flows through the Vindhyas and the Satpura ranges, which are the most important ranges of the Aravalli Hills.

**Q. 1 D** Answer the following questions briefly.

Name the delta formed by the Ganga and the Brahmaputra.

Answer:

Sunderbans delta is formed where the Ganga and the Brahmaputra flow into Bay of Bengal.

Additional Information: The rivers Mahanadi, Godavari, Krishna and Kaveri drain into the Bay of Bengal. These rivers form fertile deltas at their mouth and Sunderbans delta is one of them.

Q. 1 E Answer the following questions briefly.

How many States and Union Territories are there in India? Which states have a common capital?

Answer:

There are 29 States and 7 Union Territories in India. The states of Haryana and Punjab have a common capital – Chandigarh and Andhra Pradesh and Telangana share a common capital- Hyderabad.

Additional Information: Telangana is the latest state formed in June 2014 and the state will share its capital with Andhra Pradesh for not more

than 10 years. After that, Hyderabad shall become the official capital of Telangana and Andhra Pradesh will have a new capital.

**Q. 1 F** Answer the following questions briefly. Why do a large number of people live in the Northern plains?

Answer:

The Northern Plains are formed by the alluvial deposits laid down by the rivers- the Indus, the Ganga, the Brahmaputra and their tributaries. These river plains provide fertile land for cultivation. That is the reason for high concentration of population in these plains.

Additional Information: The Northern plains lie to the south of the Himalayas. They are generally level and flat.

**Q. 1 G** Answer the following questions briefly. Why is Lakshadweep known as a coral island?

Answer:

Lakshadweep Islands are made up of corals, and have fringing coral reefs very close to their shores. Corals are the skeletons of tiny marine animals called 'polyps'. When these living polyps die, other polyps grow on top of their hard skeletons. They grow higher and higher and thus form coral reefs.

Additional Information: The Lakshadweep islands are located off the coast of Kerala, having an area of about 32 sq. km.

**Q. 2 A** Tick the correct answers. The southernmost Himalayas are known as A. Shiwaliks B. Himadri

C. Himachal

Answer:

The Shiwalik range lies in the outer Himalayas and is 2400 km long. This range is made of unconsolidated river deposits.
