

Water

Question 1.

How much water is required to produce a page of book ?

- (a) About 2 glasses
- (b) About 14 glass
- (c) About 1 glass
- (d) About 3 glasses

▼ [Answer](#)

- (a) About 2 glasses

About two glasses of water is required to produce a page of book.

Question 2.

Where do we get water from ?

- (a) River
- (b) Wells
- (c) Lakes
- (d) All of these

▼ [Answer](#)

- (d) All of these

We get water from river, wells and lakes.

Question 3.

Where water in taps comes from:

- (a) River
- (b) Wells
- (c) Lake
- (d) All of these

▼ [Answer](#)

- (d) All of these

Water in taps comes from river, lakes and wells.

Question 4.

What part of earth is covered with water ?

- (a) One-third
- (b) Two-third
- (c) Half
- (d) None of these

▼ Answer

(b) Two-third

Two-third part of the earth is covered with water.

Question 5.

Where do we find most of the water on earth ?

(a) Oceans

(b) Seas

(c) Wells

(d) Both (a) and (b)

▼ Answer

(d) Both (a) and (b)

Most of water is in oceans and seas.

Question 6.

What happens to the animals and vegetation in drought conditions?

(a) Start growing

(b) Start dying

(c) Both (a) and (b)

(d) None of these

▼ Answer

(b) Start dying

Animals and vegetation start dying in drought conditions.

Question 7.

How can we conserve water ?

(a) By avoiding wastage

(b) By more plantation

(c) By using carefully

(d) All of these

▼ Answer

(d) All of these

We conserve water by avoiding wastage, more plantation, using carefully.

Question 8.

Blackboard dries up after wiping it:

(a) Condensation

(b) Evaporation

(c) Distillation

(d) Filtration

▼ [Answer](#)

(b) Evaporation

Blackboards dries up after wiping it is the process of evaporation.

Question 9.

We need water for:

- (a) To grow plants
- (b) To make paper
- (c) To grow fibres which are used for making fabric
- (d) All of these

▼ [Answer](#)

(d) All of these

We need water for various purposes: to grow plants, to make paper and to grow fibres which are used for making fabric.

Question 10.

Plants lose water into air as water vapour through the process of:

- (a) Evaporation
- (b) Transpiration
- (c) Condensation
- (d) None of these

▼ [Answer](#)

(b) Transpiration

Plants lose water into air as water vapour through the process of transpiration.

Question 11.

Gaseous form of water is called:

- (a) Evaporation
- (b) Water cycle
- (c) Water vapour
- (d) Floods

▼ [Answer](#)

(c) Water vapour

Gaseous form of water is water vapour.

Question 12.

The process of water changing into its vapour is:

- (a) Evaporation
- (b) Water vapour
- (c) Water cycle
- (d) Floods

▼ [Answer](#)

(a) Evaporation

The process of water changing into its vapour is evaporation.

Question 13.

The process of water vapour changing into water droplets is:

(a) Evaporation

(b) Water harvesting

(c) Water cycle

(d) Condensation

▼ [Answer](#)

(d) Condensation

The process of water vapour changing into water droplets is condensation.

Question 14.

The circulation of water between ocean and land is known as:

(a) Evaporation

(b) Water harvesting

(c) Water cycle

(d) Condensation

▼ [Answer](#)

(c) Water cycle

The circulation of water between ocean and land is known as water cycle.

Question 15.

Lack of rain for long periods cause.

(a) Flood

(b) Water vapour

(c) Drought

(d) None of these

▼ [Answer](#)

(c) Drought

Lack of rain for long periods cause drought.

Question 16.

Excessive rains cause.

(a) Drought

(b) Floods

(c) Ground water

(d) Water cycle

▼ [Answer](#)

(b) Floods

Excessive rain cause floods.

Question 17.

Water found under the ground is called:

- (a) Rain water
- (b) Drinking water
- (c) Bathing water
- (d) Ground water

▼ [Answer](#)

(d) Ground water

Water found under the ground is ground water.

Question 18.

The collection of rain water by various means is:

- (a) Water vapour
- (b) Water cycle
- (c) Water harvesting
- (d) None of these

▼ [Answer](#)

(c) Water harvesting

The collection of rain water by various means.

Question 19.

For which we use water:

- (a) Bathing
- (b) Drinking
- (c) Washing clothes
- (d) All of these

▼ [Answer](#)

(d) All of these

We use water for bathing, drinking and washing clothes etc.

Question 20.

need water.

- (a) Plants
- (b) Sun
- (c) Moon
- (d) All of these

▼ Answer

(a) Plants
Plants need water.

Match the Column-A with Column-B:

Question 1.

Column-A	Column-B
(i) Excessive rains cause floods	(a) drought
(ii) Collection of rain water by various means	(b) water vapour
(iii) Lack of rain for long period	(c) rain
(iv) Gaseous form of water	(d) water harvesting
(v) The falling of water droplets	(e) flood

► Answer

State whether the statements are True or False:

Question 1.
Water vapour is present in air only during the monsoon.

► Answer

Question 2.
Water evaporates into air from oceans, rivers and lakes but not from the soil.

▼ Answer

False

Question 3.
The evaporation of water takes place only in sunlight.

▼ Answer

False

Question 4.
The process of water changing into vapour is called evaporation.

▼ Answer

True

Question 5.

Water vapour condenses to form tiny droplets of water in the upper layer of the air where it is cooled.

▼ [Answer](#)

True

Fill in the blanks:

Question 1.

..... of water is slow process.

▼ [Answer](#)

Evaporation

Question 2.

Fog appearing on a cold winter morning is

▼ [Answer](#)

condensation

Question 3.

Steam rising from wet clothes while they are ironed is

▼ [Answer](#)

evaporation

Question 4.

The falling of water droplets is called

▼ [Answer](#)

rain

Question 5.

The water from wet road, roof tops and wet clothes changes into

▼ [Answer](#)

vapour

Question 6.

..... part of the earth is covered with water.

▼ [Answer](#)

Two-third

Question 7.

The process of changing water into vapour is called

▼ [Answer](#)

evaporation

Question 8.

The process of changing vapour into water is called

▼ [Answer](#)

condensation

Question 9.

No rainfall for a year or more may lead to in that region.

▼ [Answer](#)

drought

Question 10.

Excessive rains may cause

▼ [Answer](#)

floods
