

Telecom Services(Ms Joshi)

The various types of telecom services are:-

1. Cellular mobile services: These are all types of mobile telecom services including voice and non-voice messages, data services and PCO services.
2. Ra
3. Radio Paging services: It is an affordable means of transmitting information to persons even when they are mobile.
4. Fixed Line Services: These are all types of fixed services including voice and non-voice messages and data services to establish linkages for long distance traffic.
5. Cable Services: These are linkages and switched services within a licensed area of operation to operate media services, which are essentially one way entertainment related services.
6. VSAT (Very small Aperture Terminal): is a satellite-based communication service. It offers businesses and government agencies a highly flexible and reliable communication solution in both urban and rural areas.
7. DTH Services (Direct to Home) is again a satellite-based media services provided by cellular companies. One can receive media services directly through a satellite with the help of a small dish antenna and a set top box. Tata Sky, Airtel, Dish TV etc, offer DTH service in India.
