CHAPTER 4

YOGA

3 MARKS QUESTION (SHORT ANSWER QUESTION) [60 WORDS]

Q1. Describe the benefits of pranayama.

- Ans.**
1. Pranayama is as necessary for the mental purity as bathing is necessary for physical purity. Yogic kriyas such as neti, dhanti, kapalbhati etc. controls the kaph, vaat an pitt.
 2. Continuous performance of mayurasans and other yogic kriyas increases facial beauty and makes the skin glow.
 3. Makarasana, Savasana, Salabhasana help in reducing stress and people feel happy.

Q2. Write a short note on dhayana and Samadhi.

Ans. Dhayana :

It refers to meditation or a sense of radical self awareness. It is a stage prior to Samadhi. Dhayana is part of life. In fact, complete concentration of mind is called dhayana.

Samadhi :

In Samadhi the Atma gets united with the paramatma. Samadhi state is attained when self awareness disappears completely too, feel divine pleasure after attaining the state of Samadhi. One experiences the virtual truth.

Q3. Suggest any three exercise dependent rimed and any three diet dependent remedies.

Ans. Exercise Dependent Remedies :

1. **Regular Physical Exercise:**

Obesity can be controlled by practicing various aerobic exercises, jogging, cycling, dance etc. for at least 60 minutes every day.

2. **Yogic Exercises :**

Obesity can be reduced by practicing various types of asanas and other yogic exercise.

3. **Resistance Exercises :**

These exercises strengthen tendons and ligaments. While performing such exercise one must fix the number of repetition rather than amount of weight lifted. These are considered safe and good for health.

Diet Dependent Remedies :

1. **Avoid fatty foods:**

Fats provide maximum calories to the body, extra fats are stored in the body. In order remain slim one must avoid fatty foods.

2. **Avoid junk and fast food:**

Fast food like pizza, burger, patties, samosa, chole bhature, pastry, cookies etc. Contain very high calorific value. Therefore such foods may be avoided.

3. **Change in life style :**

For short distance travel, we must walk more on foot instead of using rickshaw, scooter, car etc. We should use stairs in place of lifts and do more up and down in our houses.

Q4. Write any three steps for prevention/management of back pain.

- Ans.**
1. Proper posture while sitting is important to avoid stress on back muscle. It helps in avoiding back pain.
 2. Many a times, joints of the spinal chord get disjuncted while lifting heavy objects resulting in pain. At times, the lower portion of the body becomes numb, therefore one should be very careful while lifting things.
 3. Deposition of unnecessary fat in the body causes obesity, which results in putting extra pressure on spinal chord and lower back. It causes back pain, so we should take appropriate diet with less fat and keep aware the obesity.

Q5. If the weight of a person is 80 Kg and height is 1.75 meter, calculate him BMI.

Ans. Weight of the body = 80 Kg

Height = 1.75 M

$$\text{BMI} = \frac{\text{Weight of the body}}{(\text{Height in Mtr})^2}$$

$$= \frac{80}{1.75 \times 1.75} = \frac{80}{3.0625} = 26.12 \text{ Kg/Mt}^2$$

Q6. Classify the Asanas

Ans. 1. Dhyanatmak Asana (Meditative Asana) :

Padmasana, Siddhasana, Swastikasana, Vajrasana, Gomukhasana etc.

These asanas should be practiced in peaceful atmosphere. It increases the concentration power.

2. Relaxative Asana:

Shashankasana, Savasana, Makar asana etc. These asanas help in relaxation of physical and mental fatigue. They provide relaxation to our body and mind.

3. Corrective asana :

Shirsasana, Sarvang asana, Shalabh asana, Bhujang asana, Mayur asana, Paschimotanasana etc.

These are very helpful in physical development. They provide efficiency to Pranayama, Pratyahara and dharna.

CHAPTER 4

YOGA
