Definition

Auxiliaries to trade are also known as business services. Service sector includes commercial firms engaged in banking, communication, transport, insurance and warehousing. Business cannot be even imagined in the absence of these services. <u>All these services collectively constitute the Service Sector</u>.

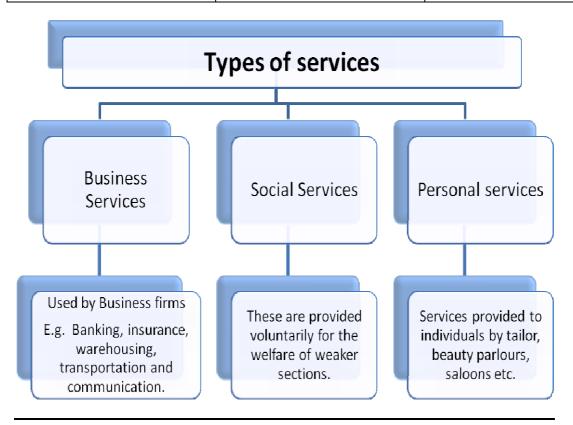

• Nature/Features/Characteristics of services

• <u>Difference between Services and goods</u>

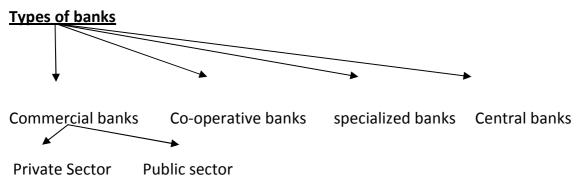

<u>Basis</u>	<u>Services</u>	<u>Goods</u>	
	An activity or a process. e.g.,	A physical object. e.g., a	
Nature	watching a movie in a cinema	video cassette of movie	
	hall		
Туре	Heterogeneous	Homogeneous	
Intangibility	Intangible e.g., doctor	Tangible e.g., medicines	
	treatment		

	Different customers having	Different customers getting	
Inconsistency	different demands e.g	standardized demands	
	mobile services	fulfilled	
	Simultaneous production and	Separation of production and	
Inseparability	consumption e.g., eating an	consumption e.g., purchasing	
	ice-cream in a restaurant	ice cream from a store	

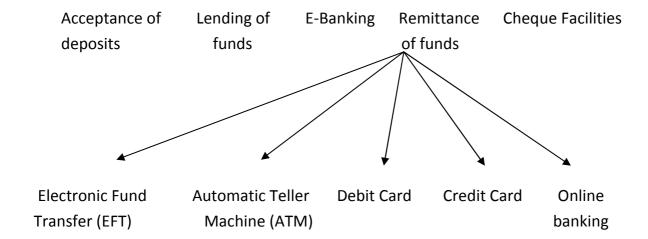

Banking Services

Bank is an institution that accepts deposits, withdrawal by cheques and makes loans and advances for the purpose of earning profits.

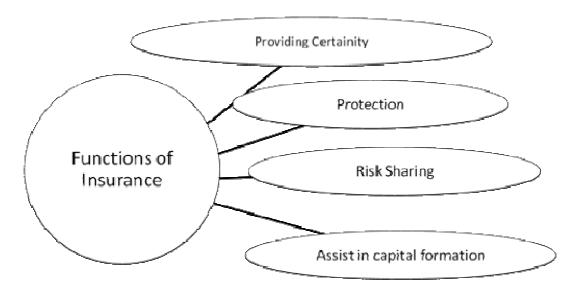

- **<u>I. E-BANKING:</u>** E-banking means banking transactions carried out with the help of computer systems (i.e., that is banking over the internet).
- **1. Electronic Fund Transfer (EFT):** Under this system, a bank transfers wages and salaries directly from the company's account to the accounts of employees of the company.
- **2. Automatic Teller Machine (ATM)**: It refers to an electronic terminal that allows people with plastic card to perform simple banking transactions like withdrawal of cash 24x7 without any help of human teller.
- **3. Debit Card:** It refers to a plastic card that allows the bank to take money from the customer's account and transfer it to a seller's account.
- **4. Credit Card:** It refers to a plastic card that allows the customer to buy now and payback the loaned amount to bank at a future date.
- <u>5. Online Banking:</u> Under this system, when the customer gives instruction on his computer, the bank computer transfers money from/ to customer's account to biller's account.

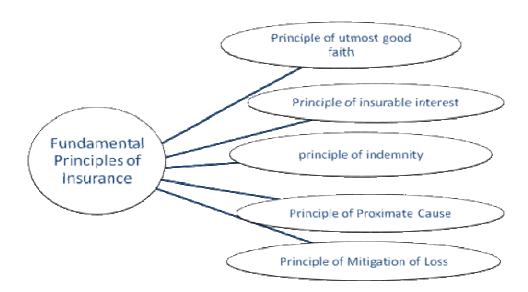

Insurance:

It is a contract where by in exchange of fixed consideration one party promises to pay a fixed amount either at happening of an event or at the expiry of certain period.

Functions of Insurance

• Fundamental Principles of insurance:

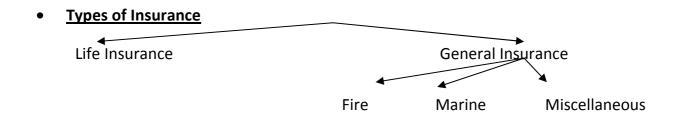

<u>Principle of utmost faith:</u> refers that no material or important facts should be concealed by both the parties of insurance contract.

<u>Principle of Insurable Interest:</u> There must be some pecuniary interest in the subject matter of the insurance contract.

<u>Principle of Indemnity:</u> Refers that the insured can get only the compensation against actual loss and he cannot make profit out of the insurance.

Principle of proximate cause: It refers to the direct cause and not the remote cause.

<u>Principle of mitigation of loss:</u> states that it is the duty of the insured to take reasonable steps to minimize the loss/damage to the insured property.

<u>Life Insurance:</u> It is a contract under which the insurer, in consideration of a premium, undertakes to pay a fixed sum of money on the death of the insured or on the expiry of a specified period of time, which ever is earlier.

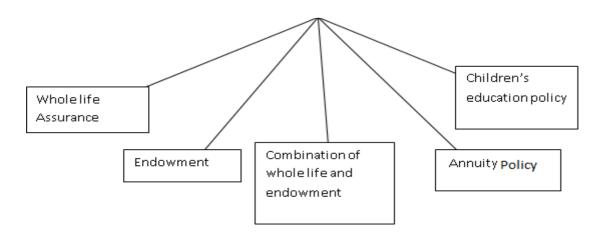

<u>Fire insurance:</u> it is a contract whereby the insurer undertakes to make good any loss/damage caused by fire during a specified period.

<u>Marine Insurance:</u> A marine insurance is an agreement where by the insurer undertakes to indemnify the insured loss against perils of the sea.
