

SCIENCE

Habitat (the natural surroundings in which an animal lives) of monkey is shown in the picture.

Monkeys live on the trees.

Activity 6:-Prepare a slide show consisting of 8 slides showing habitat of different animals. Submit the Slide Show prepared in a CD.

Food chain - Every living being needs food in order to live. A food chain shows how each living being gets food. Some animals eat plants, some animals eat other animals.

Activity 7:-You have to arrange the words given below to make any two food chains. Paste/draw pictures of the same on an A4 size sheet. One example of the food chain is shown below.

- 1) Frog Grasshopper Sun Hawk Grass
- 2) Tiger Plant Sun Goat
- 3) Plants Sun Hawk Lizard Insects
- 4) Shrimps Polar Bear Seal Algae Fish
