

BEING ALIVE

The cell is the structural and functional unit of life
Just as a house is made of bricks, all living organisms are made of cells

DIFFERENCES BETWEEN PLANTS AND ANIMALS

PLANTS		ANIMALS
Do not move Make their own food with the help of carbon dioxide, water, chlorophyll and sunlight Grow throughout their lives Quick response to stimuli		Move from place to place Depend on plants or other animals for their food. Cannot make their own food Stop growing after a period Slow response to stimuli
